Summary

As a sixth-semester Computer Science student, I have excellent multitasking skills. I am known for my punctuality, enthusiasm, and commitment to my work. I have experience in web development, software development, and artificial intelligence, and I'm ready to apply these talents to real-world projects. I am interested about creating a positive difference with technology and am excited to gain hands-on experience by contributing to the enhancement of CIRCLE's Chatbot, Baji.

Core Competencies

- | | | | |
|---------------------------|------------------------|--------------------|----------------------------|
| • Web Development | • Software Development | • Microsoft office | • Growth Mindset |
| • Artificial Intelligence | • Problem Solving | • Logical Thinking | • Digital logic and design |
